Tintometer wins the "Golden Wave" for 2013

Real innovation brings about permanent improvements in the market. This is why Europe's largest-circulation pool & spa magazine "Schwimmbad & Sauna" (www.schwimmbad.de), an organisation with more than 40 years of tradition, awards a prize every two years for the most forward-looking developments in the pool and wellness field. They call their award the "Golden Wave".

The practical use of outstanding products is a main criterion for the judges – and this is ensured by the make-up of the jury, whose members are all renowned and experienced specialist swimming pool manufacturers. This year there were nearly 110 products in the competition.

This year the "Golden Wave" in the water treatment & chemicals category was awarded to Tintometer GmbH in Dortmund (www.lovibond.com) for the "Scuba II".

The key to this innovation: "Scuba II" makes it possible to carry out control measurements of pool water, immediately and accurately. Immersing the unit causes the integrated measurement chamber to fill with water. A reagent tablet is added and this generates a characteristic colour which is measured using the photometric principle and displayed as a figure on the screen. Five different parameters can be measured in less than 10 minutes.

WAVE** 2011

Golden Wave 2011

In 2011, the Lovibond® Pooltester concept have already been awarded with the second Price of the Golden Wave Award in the category „Water Treatment & Chemicals“ of the journal „Schwimmbad & Sauna“ (www.schwimmbad.de). The jury said:

Pooltester-Set

The new box with its practical closure mechanism provides total protection for all the utensils in the „Pooltester“ set and is now even easier for the user to handle.
